PROFILE

Seeking a challenging role as a Software Engineer in the field of Information Technology, where I can leverage my skills in Java Full Stack Development, problem-solving, and real-world project experience to build scalable, secure, and innovative applications while continuously enhancing my technical and professional growth.

EDUCATION

BE (IT)

Theem College Of Engineering

August 2022 - May 2026

HSC (Science)

New English College

July 2020 - May 2022

SSC

R. V. Nerker Secondary School

April 2020

INTERSHIPS & EXPERIENCE

Qspiders - Incubation Internship Integrated Program

Selected through campus recruitment for training in Java, SQL, and Web Technologies.

Hackveda Solutions Pvt. Ltd. - Java Internship

Worked on Java programming and software development concepts during the internship period.

CERTIFICATES

- Finalist in several Hackathons, including IIT Bombay.
- Certified in Generative AI Workshop powered by AWS & Partners.
- Certified in Green Skills & AI/ML - Skills4future, Edunet.
- Completed IBM AI Foundation Program, gaining hands-on AI insights.

LANGUAGES

English

Hindi

Marathi

SKILLS

JAVA

- Strong understanding of Core Java and Object Oriented Programming (OOP) concepts.
- Hands-on knowledge of Exception Handling and Java Collection Framework concepts such as List, Queue, and Set.
- Understanding of Map implementations including HashMap, LinkedHashMap, and TreeMap.

SQL

- Strong understanding of RDBMS concepts, constraints, normalization, and relational tables.
- Proficient in writing queries and working with SQL Joins.
- Familiar with DDL, DML, and TCL commands.

Web Technologies

- Proficient in HTML, CSS and JavaScript with experience in responsive web development.
- Developed animated frontend projects featuring interactive and user-friendly UI designs.

PROJECTS

1. PharmaTrace <https://github.com/patildhrup/PharmaTrace>

Blockchain system to track pharmaceutical drugs across the supply chain, preventing counterfeit medicines through tamper-proof records.

2. PayShield <https://github.com/mr-shlok/UPI-Shield>

Developed a UPI fraud detection system using data analysis and anomaly detection to identify suspicious transactions and enhance payment security.

3. Insight Astra <https://github.com/patildhrup/insight-Astra>

Built a Conversational AI tool at the InsightX Hackathon to query digital payment data using natural language and generate real-time, explainable insights.

4. GreenMiles <https://github.com/mr-shlok/GreenMiles-EV>

Developed an AI-powered platform for EV users enabling smart route planning, battery health prediction, charging station discovery, and sustainability tracking using real-time data and machine learning.
